

IMMUNIZATION POLICY

The Clear View School Day Treatment Center program requires immunization records from all students prior to admission. We comply with yearly reporting requirements to the New York State Department of Health. All students are required to be immunized according to the most current New York State Department of Health schedules. Exceptions may be evaluated for students presenting requests for medical or religious exemption.

In accordance with New York State Department of Health recommendations for control measures related to disease outbreaks, unvaccinated students will be excluded from program until 25 days after isolation of known disease cases in the school community. A student may return to program after one dose of the appropriate immunization and a schedule for full immunization.
